Note: Infant, neonatal and perinatal mortality rates for local areas can fluctuate quite substantially between years due to the small number of deaths recorded at these ages.

1 Figures for England and Wales are based on boundaries as of February 2018

2 The age-standardised mortality rates for 2017 are standardised to the 2013 European Standard Population, expressed per 100,000 population. Age-standardised rates are used to allow comparison between populations which may contain different proportions of people of different ages. ASMRs are based on mid-2017 population estimates. For more information on these rates please see our [User guide to mortality statistics](#).

3 K04000001 is England and Wales; J09000001 is Elsewhere (outside England and Wales).

4 The deaths of those whose usual residence is outside England and Wales are included in total figures for England and Wales, but excluded from any sub-division of England and Wales.

5 The Isles of Scilly were recoded on 1 April 2009. They are separately administered by an Isles of Scilly council and do not form part of Cornwall but, for the purposes of the representation of statistical data, they have been combined with Cornwall.

6 The deaths of those whose usual residence is outside Scotland are included in total figures for Scotland, and are also included in any sub-division of Scotland based on where the death occurred.

7 The deaths of those whose usual residence is outside Northern Ireland are included in total figures for Northern Ireland, and are also included in any sub-division of Northern Ireland based on where the death occurred.
